**Start-up Experience:** Anuta Networks and KKTechs.in (co-founder; end-to-end product delivery)

## Education:

**B.Tech, Computer Science –**  
Laqshya Engineering College, 2016.

## Summary:

Front-End Developer with 6+ years' experience building responsive, scalable React and TypeScript applications. Skilled in UI/UX implementation, REST API integration, component-driven architecture, and translating wireframes into reusable components. Experienced in greenfield projects, autonomous work, and collaborating with onshore/offshore teams.

## Experience:

**Freelancer | Service Advisor | Volvo Cars**  
**Canberra, Australia | Jan 2025 – Present**

- Provided technical and operational support to customers, ensuring efficient issue resolution and consistent service quality, while also assisting with freelance software development projects in India.

**Senior Engineer | Cambium Networks, India | Oct 2022 – Jul 2024**

- Developed modern, responsive UI components using **React 18**, Redux, and REST APIs for large-scale network planning tools..
- Collaborated daily with **project managers, backend engineers, and globally distributed teams** to deliver greenfield features.

**Software Engineer | Anuta Networks, India | Jul 2018 – Oct 2022**

- Developed Angular front-end features and aided migration to modern React architecture.
- Built reusable components, dashboards, and workflow screens for enterprise clients (Disney, Jio)

**UI Developer | AP State GST Project | May 2017 – Jul 2018**

- Built responsive web portals using JavaScript, .NET, PHP, MySQL, and REST APIs.
- Implemented front-end features with attention to user experience and performance.

**Freelancer / Co-Founder | KKTechs.in | Jan 2016 – May 2017**

- Delivered full-stack web applications for small businesses using Angular, PHP, and MySQL.
